

# Polio Australia

Representing polio survivors throughout Australia

## Your Voice Can Improve Neurological Care

---

As a member of **Neurological Alliance Australia**, we are supporting its first national survey examining gaps in neurological care, support, research and identifying innovation across Australia.

The survey seeks insights from people living with neurological and neuromuscular conditions, carers, clinicians, researchers, service providers, pharma industry and policymakers.

Findings will help identify priority areas for improvement and inform national advocacy and policy.

This survey will be conducted every two years to monitor improvements in services, supports and outcomes.

### **The survey closes on Friday 08 May 2026.**

We strongly encourage you AND your family members, carers, and clinical/support team to complete the survey. This survey is a big step towards being able to convince governments that our population demands attention.

For the post-polio community, this survey is a unique and pertinent opportunity to:

- demonstrate our population size
- show the distribution of our population
- have a voice on the national and state issues you face; and
- describe your needs in order to boost awareness of those needs

It is important that anyone in our polio community who fits these categories completes this survey:

- Person with a neurological or neuromuscular condition
- Carer and/or family member
- Health professional – clinician or allied health
- Service provider (non-clinical)
- Advocacy and/or patient organisation
- Researchers
